Joe, it's a pleasure for me to recommend you and the Restaurant Consultants team.

I don't know what's more impressive – the fact that you've helped my firm for over twenty years or the fact that together we've completed over one hundred building projects in the DC metro area. You're responsible for many of our most successful projects being completed and occupied on time, which is no small feat in the DC environment.

You've helped us and our clients negotiate the serpentine path of approvals needed for the zoning processes, architectural review boards, demolition and building permits, as well as provide valuable equipment consulting services to save our clients time and money.

Because we rely on you for your attention to detail and knowledge of local jurisdiction requirements and procedures we'll continue to call on you and your team for guidance and assistance in these matters.

Sincerely,
